PROJECTS

GRIDFLOW – AI - Powered Observability SaaS Platform

Stack: React, TypeScript, Node.js, Express, MongoDB, Socket.IO, Docker

Built a multi-tenant observability SaaS that enables organizations to deploy monitoring agents, collect real-time infrastructure telemetry, detect operational incidents, and visualize system health through centralized dashboards. Designed secure agent provisioning, JWT-based authentication, organization-level isolation, AI-powered incident intelligence, topology monitoring, and real-time alerting for scalable multi-organization infrastructure management.

HIREBRIDGE – AI - Powered Recruitment Platform

Stack: React, TypeScript, Node.js, Express, MongoDB

Built an AI-powered recruitment platform with resume parsing, ATS scoring, eligibility filtering, candidate ranking, and multi-stage hiring pipeline management. Developed recruiter and student portals featuring interview scheduling, real-time notifications, analytics, and AI-driven hiring insights.

TRACELOCK – Dependency Threat Intelligence Platform

Stack: React, TypeScript, Node.js, Fastify, PostgreSQL, Prisma

Built a dependency security platform that scans package manifests and lockfiles, detects real OSV vulnerabilities, performs attack-path/blast-radius analysis, and visualizes transitive dependency risks through enterprise-grade security dashboards.
